How to Use the Report

Info-Tech’s Data Quadrant Reports provide a comprehensive evaluation of popular products in the Enterprise Resource Planning - Midmarket market. This buyer’s guide is designed to help prospective purchasers make better decisions by leveraging the experiences of real users.

The data in this report is collected from real end users, meticulously verified for veracity, exhaustively analyzed, and visualized in easy to understand charts and graphs. Each product is compared and contrasted with all other products in the category to create a holistic, unbiased view of the product landscape.

Use this report to determine which product is right for your organization. For highly detailed reports on individual products, see Info-Tech’s Product Scorecard.

This report is available free of charge for internal use only to assist with software evaluation and selection. Sharing, republishing, distributing, or otherwise copying any portion of this report without the express written consent of SoftwareReviews.com is strictly prohibited.

 ProcessPro	 PSI ERP	 QAD Cloud ERP
 Rootstock Cloud ERP	 Sage Intacct	 Sage X3
 SAP Business ByDesign	 SAP Business One	 SouthWare ERP Accounting Software
 Striven	 STYLEman ERP	 SynergyERP
 SYSPRO ERP	 The ADaM System	 The Decision Builder
 TrueERP	 TYASuite Cloud ERP Software	 Tyler Technologies Munis ERP
 Unanet AE	 Unit4 ERP	 VersAccount Cloud ERP
 Visibility.net ERP Software	 CGS Visual ERP.net	 WinMAGI
 WorkWise ERP Application Suite	 Xantel AMAPS+PLUS	 Xperia Comprehensiv Enterprise System
 XTuple ERP	 Yonyou ERP	

Category Overview

This page provides a high level summary of product performance within the Enterprise Resource Planning - Midmarket category. Products are ranked by a composite satisfaction score (Composite Score) that averages four different areas of evaluation: Net Emotional Footprint, Vendor Capabilities, Product Features, and Likeliness to Recommend. The Net Emotional Footprint Score measures user emotional response ratings of the vendor (e.g. trustworthy, respectful, fair).

Use this data to get a sense of the field, and to see how the products you’re considering stack up.

Rank	Product	Composite Score	Net Emotional Footprint	Net Emotional Footprint Distribution	Vendor Capabilities	Product Features	Likeliness to Recommend	Number of Reviews
	 SAP Business One	8.6/10	+91 		82%	83%	88%	28
	 Sage Intacct	8.6/10	+93 		82%	83%	86%	34
	 Acumatica Cloud ERP	8.6/10	+88 		84%	85%	85%	82
	 FinancialForce ERP Cloud	8.0/10	+86 		76%	77%	80%	32
	 Oracle NetSuite ERP	8.0/10	+82 		77%	78%	81%	77
	 Sage X3	7.8/10	+80 		74%	77%	82%	70
7	 BST10	7.5/10	+73 		72%	71%	85%	29
8	 IFS ERP	7.4/10	+77 		73%	71%	73%	49
9	 Deltek Vantagepoint	7.3/10	+74 		69%	73%	76%	54
10	 Unit4 ERP	7.2/10	+63 		70%	73%	80%	56
Average Scores		7.6/10	+74 		74%	75%	80%	46

Category Overview

This page provides a high level summary of product performance within the Enterprise Resource Planning - Midmarket category. Products are ranked by a composite satisfaction score (Composite Score) that averages four different areas of evaluation: Net Emotional Footprint, Vendor Capabilities, Product Features, and Likelihood to Recommend. The Net Emotional Footprint Score measures user emotional response ratings of the vendor (e.g. trustworthy, respectful, fair).

Use this data to get a sense of the field, and to see how the products you’re considering stack up.

Rank	Product	Composite Score	Net Emotional Footprint	Net Emotional Footprint Distribution	Vendor Capabilities	Product Features	Likelihood to Recommend	Number of Reviews
	Products with Insufficient Data							
--	 Infor SyteLine	7.7/10	+76 		73%	79%	82%	12
--	 Unanet AE	8.5/10	+96 		78%	76%	89%	5

This page summarizes user satisfaction with a variety of vendor capabilities regarding their product offering(s). Look for strong and consistent performance across the board when assembling your shortlist, and follow-up on areas of concern during the evaluation and negotiation processes.

This section provides detailed information on user satisfaction for each vendor capability regarding their product offering(s). Use these pages to dig deeper into areas of particular interest or concern.

Vendor Capability Satisfaction

Vendor Capabilities

This table lists and briefly describes all vendor capabilities that are evaluated in the Enterprise Resource Planning - Midmarket software category. For your convenience, you will also find longer descriptions of the capabilities under the capability subheadings in the subsequent pages.

Business Value Created	The underlying purpose of software is to create value for employees, customers, partners and ultimately shareholders. As a result, it is imperative that any software selection be aligned with the organization's needs and deliver enough business value to justify the cost. The data below highlights the satisfaction level associated with the business value derived from various product offerings. Use this information to identify the software that consistently creates business value for its customers.
Breadth of Features	Users prefer to work with feature rich software that enables them to perform diverse series of tasks as opposed to one they find restrictive. The data below highlights the satisfaction level associated with the breadth of features from various product offerings. Use this information to identify which software offers valuable comprehensive functionality that extends beyond the basic level.
Quality of Features	Feature quality is just as important as quantity. Software needs to do what you're purchasing it to do, easily, intuitively, reliably, and effectively. Use the data in this section to gauge whether or not a product follows through on the marketing hype by delivering high quality features.
Product Strategy and Rate of Improvement	Purchasing software can be a significant commitment, so it's important to know if your vendor is serious about the need for constant improvement and deliberate strategic direction. Vendors who don't stay on top of emerging needs and trends won't enable you to meet your business goals. Use the data in this section to separate innovators from imposter.
Usability And Intuitiveness	End user learning curves cost the organization money. Pay attention to your end users' technical ability to determine how important UX is in your purchase.

Vendor Support	The importance of vendor support will vary for each organization depending on internal capabilities, but there will always be issues that only the vendor can resolve. Use the data in this section to see which vendors tend to under-serve their product and which will offer quality support.
Ease of Data Integration	The ability to integrate with other systems is increasingly important; without this, manual data loading and extraction can be time-consuming and prone to error. Use this section to see which vendors will cause headaches and which will make data integration easy.
Ease of Administration	Administrative interfaces don't get the same attention as those built for end users, but they shouldn't be clunky or unintuitive. Use the data in this section to determine which vendors make administration easy, so that your IT personnel can resolve issues and perform configurations efficiently and effectively.
Ease of Customization	Out-of-the-box functionality often isn't enough, especially for niche or industry-specific software, and the reason you're buying rather than building is to save time and money in the first place. Don't get bogged down in a difficult customization; use the data in this section to make sure you can easily achieve the functionality you need for your particular situation.
Availability and Quality of Training	Effective and readily available training enables users to get the most out of the software you've chosen. Use this section to make sure your vendor's training programs and materials measure up.
Ease of Implementation	Choosing the right software is only the first step. Successfully implementing the new solution is necessary in order to realize its full value and promote end user adoption. Use the data in this section to determine which software is easy to implement, and which may jeopardize your goals by causing trouble in this stage.

This section provides detailed information on user satisfaction for each vendor capability regarding their product offering(s). Use these pages to dig deeper into areas of particular interest or concern.

Vendor Capability Satisfaction

Quality of Features

Feature quality is just as important as quantity. Software needs to do what you're purchasing it to do, easily, intuitively, reliably, and effectively. Use the data in this section to gauge whether or not a product follows through on the marketing hype by delivering high quality features.
